

European Workshop on Atmospheric Dust

Organised by the Dust Doctoral Network (Dust-DN)

Nicosia, 20 October 2025

The **Dust Doctoral Network (Dust-DN)** aims to advance our understanding of atmospheric dust processes and microphysics, identify the signatures of source regions, assess the socio-economic impacts of dust transport, and improve the quantification of dust's role in the climate system.

We are pleased to announce the **European Workshop on Atmospheric Dust**, which will take place in **Cyprus (venue to be confirmed)** from **20 to 22 April 2026**.

The workshop will serve as a **forum for the scientific community** to discuss current advances in dust research, exchange ideas, and strengthen collaborations across Europe. It will also “photograph” the present state of dust science in Europe by showcasing results from the Dust-DN network and beyond.

Due to logistical constraints, participation will be limited to approximately **100 attendees**. Priority will be given to **Dust-DN partners and presenting authors**. Further details on the venue, registration, and fees will be announced soon on the dedicated page: <https://dust-dn.cyi.ac.cy/dust-dn-workshops/workshop2026/>.

Key Topics

- Dust microphysical properties and processes
- Source regions and their influence on atmospheric dust properties
- Socio-economic impacts of dust
- Dust in the global climate system

Key Dates

Abstract submission deadline: 1 December 2025

Notification of acceptance: 1 February 2026

Registration deadline: 1 March 2026

Funded by the European Union's Horizon Europe research and innovation programme under the Marie Skłodowska-Curie Actions Doctoral Networks (Grant Agreement No. 101119479 — Dust-DN).
